Two Way Binding & Forms

Forms

Binding

Two Way Binding

Binding Code

```
$scope.transferAmount = 0;  
$scope.currentBalance = 3000;  
$scope.afterBalance = function() {  
    return $scope.currentBalance - $scope.transferAmount;  
}
```

Cohesive Solution

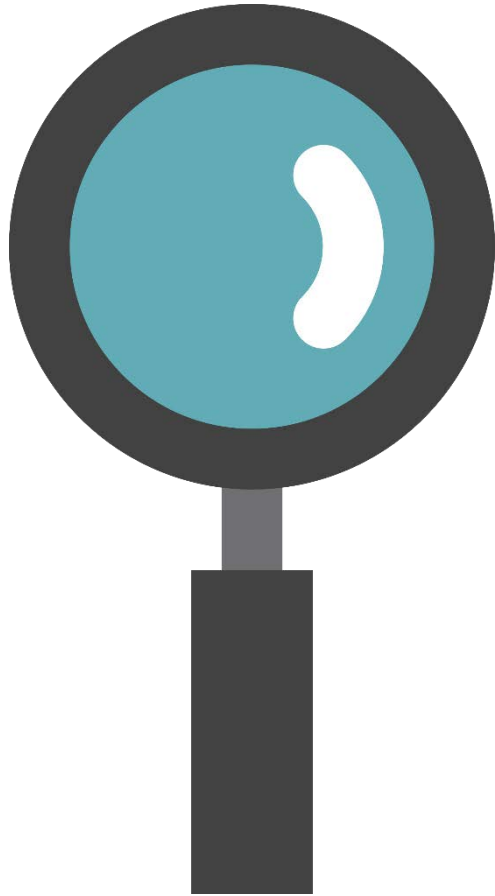

Guidance

Poor API Hiding

Inconsistencies

Difficult-to-learn Paradigms

Binding Code

```
document.getElementById('btn')  
  .addEventListener('click', function(e1) {  
    alert('clicked!');  
  })
```

Binding Code

```
<button id="btn" ng-click="handleClick()">Click  
Me</button>
```

```
$scope.handleClick = function() {  
    console.log('clicked!');  
}
```

Full Stack Affinity

Accessibility & Internationalization

ngAria

Numbers, Dates, Currency

Localized Data

```
{{amount | currency}}
```

```
{{theDate | date: 'longDate'}}
```

```
{{count | number}}
```

Accessibility & Internationalization
