Declarative UI Templates
HTML is already a good templating language; angular makes it better. Preview your UI in your favorite HTML editor.

Declarative
UI Templates

Two-Way Data Binding
With angular, the view and data model are always in sync — there is no need for manual DOM manipulation.

Two-way
Binding

Framework
Angular supports the entire development process, provides structure for your web apps, and works with the best JS libraries.

Framework

MVC with Dependency Injection
Separation of concerns, loose coupling, and inversion of control — all the good stuff for testable and maintainable code.

MVC with
Dependency
Injection
